**NEW CLEANING SYSTEM TO BE
LAUNCHED AT UPCOMING ISSA TRADESHOW**

Chicago, IL—September 5, 2008—Tornado, a leading manufacturer of professional cleaning tools and equipment, will be introducing an entirely new floor and carpet cleaning system at the ISSA/INTERCLEAN® North America tradeshow on September 8-11, 2008, Las Vegas, NV.

The new “multi-wash” system, the BR 13/1 MW, is essentially two machines in one. Using low-moisture, encapsulation technology, it can be used to “Green-clean” carpets.

And, incorporating advanced cylindrical brush technology, it is perfect for hard-surface floor cleaning and is particularly effective at cleaning tile and grout floors.

The BR 13/1 MW is engineered with twin, counter-rotating brushes that are able to dig deep into carpet fibers and deep-clean hard-surface floors—especially grout areas—loosening and removing soils. It can also be used to clean escalators and similar “grated” floor surfaces.

According to Kyle McCabe, a Tornado engineer, the ergonomically designed BR 13/1 MW is specifically designed for hospitals, schools, hotels, restaurants, as well as office facilities. Ergonomic features include:

- Handle adjusts to all user heights
- Handle folds to clean under desks and furniture
- Controls are easy to reach and simple to use
- The machine is exceptionally quiet.

“This [all] means the BR 13/1 MW works *with* the cleaning worker, minimizing fatigue and improving worker

productivity,” says McCabe.

More information about the BR 13/1 MW will be available in upcoming months. “We are very proud of this machine,” adds McCabe. “It’s versatile, multi-tasking, and—because it cleans two surfaces not just one—a true cost saver as well.”
