Versatile Floor Buffer

Andres Vargas a contract cleaner in Chicago, IL., needed a new floor machine. "The buffers I saw," says Vargas, "were either too big, small, or cumbersome—until I saw the Bi-Speed Scrub Buffer by Tornado® Industries."

The Bi-Speed comes in 17-inch and 20-inch models. Vargas says both models offer greater versatility than other machines he encountered. "With two speeds—one for refinishing floors and one for polishing—I really get two machines in one. That saves me money and I can use these buffers for a variety of floor maintenance jobs," says Vargas.
