Powerful Floor Machine for Small Areas

A printing/publishing company in Santa Rosa, California, occupied several small spaces in an office park.

“Our location is convenient,” says the owner. “But the offices are small, and the restrooms are very small. With the type of work we do, the bathroom floors take quite a beating.”

The owner wanted the restroom floors to be clean and shiny at all times but had trouble finding a machine that could “fit” in the small areas.

The cleaning contractor decided to try a new machine: Tornado’s BD 14/4 Compact, Cordless, Automatic Scrubber.

This eco-friendly machine is designed for smaller areas yet can clean approximately 11,300 square feet per hour.

Further, the BD 14/4 has an effective water-recovery system with an integrated, parabolic squeegee system located *just one inch* behind the pad.

“The BD 14/4 is perfect for small floor areas and leaves floors clean, shiny, and healthy,” concludes the owner.
