Fresh Air Never Smelled So Good

Burnishing floors can be a dusty job. The machine is actually grinding the top layer of finish off the floor, removing heel marks and contaminants as it cleans but creating dust at the same time.

Now the Tornado Industries® 2500B Clean-Air Glazer™ burnisher leaves floors shiny and clean without releasing dust and impurities into the air.

The 2500B has a clean-air filtering system that captures and traps most contaminants, preventing them from becoming airborne. This helps protect the health of the cleaning worker, building occupants, and the environment.

For more information, visit www.tornadovac.com, or call toll-free: 800-VACUUMS.
