

Doing More with Less . . .

. . . Less water, solution,
air-borne allergens,
noise and worker fatigue

Cleaning for Improved Health and Productivity

Let Tornado's commercial cleaning equipment improve the overall health and safety of your facility by conserving natural resources including water and cleaning solution. Achieving the highest standards of cleanliness, health and safety have never been easier with Tornado's line of hard and soft floor care equipment, designed for maximum productivity and durability.

Remove soils and contaminants in your facility more efficiently and in less time with Tornado's innovative line of soft and hard floor care equipment. To rejuvenate hard floor surfaces, try our new World Class BR and BD family of automatic scrubbers designed for environmental sustainability. Available in your choice of disc or cylindrical brush, our eco-friendly cylindrical brush scrubbers deliver low-moisture cleaning technology that uses less solution, water and chemical. The results? You get cleaner, safer floors, increased cleaning productivity, lower operating costs and a healthier work environment.

What's more, Tornado® equipment is designed with environmental stewardship and social responsibility in mind. The use of low moisture scrubbers or CRI certified carpet care equipment meets the requirements of the 2008 U.S. Green Building Council LEED EB EQ 3.7 Green Cleaning standards for sustainable cleaning equipment.

We have worked hard to make Tornado® the most trusted brand of cleaning equipment in the workplace and are excited to offer you our award winning products.

	M Series 2000 Clean-Air Glazer (98492) Value and clean-air burnishing power		

Eco-Friendly AGM Batteries Versus Wet Acid-Cell Batteries?

Tornado® Auto Scrubbers are available in your choice of traditional flooded (wet) batteries or new, eco-friendly EV Dry Cell, maintenance-free batteries. Wet acid-cell batteries contain sulfuric acid and require your cleaning crew to maintain proper fluid levels to ensure that the batteries perform properly. This periodic maintenance process can be dangerous to both the cleaning worker and to your facility's indoor environment, and if overlooked can both shorten the life cycle and productivity of your traditional battery, as well as create a health risk to your cleaning staff. With Tornado's eco-friendly EV Dry Cell batteries, you can say good-bye to battery maintenance, risk of work-related injury, and hello to increased worker safety, facility health and an increase in cleaning productivity!
