Specifications

Model K 2400 HH
Operating pressure 2400 PSI
Water volume 2.5 GPM
Engine 5.0 HP Honda GC 160

Model K 2400 HB
Operating pressure 2400 PSI
Water volume 2.5 GPM
Engine 5.5 HP Briggs & Stratton

Model K 2500 HK
Operating pressure 2500 PSI
Water volume 2.5 GPM
Engine 6.0 HP Kohler Command

In USA Call: 1-800-537-4129

Never point nozzle at people or animals.

Never drink alcohol or use drugs while operating this equipment.

Never spray electrical connections, electrical outlets or fixtures.

Never add fuel with the engine running or operate where fuel has been spilled.

Never touch hot surfaces or allow accessories to contact hot surfaces.

Never operate in an enclosed space, exhaust fumes are dangerous.

Never operate near utilities with open flames.

Never operate pressure washer without the water turned on.

Never use hot water.
Safety Warnings
When using this product, basic precautions should always be followed:

- Read all the instructions before using the product.
- Fire hazard! Do not add fuel with the engine running. Do not operate if fuel has been spilled. Instead, move the machine to a different location and avoid creating sparks.
- Operate and fuel machine in a well ventilated area, free of devices featuring an open pilot or flame such as boilers, water heaters, etc.
- High pressure jets can be dangerous if subject to misuse. The jet must not be directed at persons, animals, electrical devices, or the machine itself.
- Wear safety goggles.
- Do not use acids, alkaline, solvents, or any flammable material in this product. These products can cause physical injuries to the operator and irreversible damage to the machine.
- The machine has hot surfaces which can cause burns. Operate the unit in a safe environment and away from children.
- Do not allow the high pressure hose to come into contact with the muffler guard.
- Do not leave the machine running unattended.
- Learn how to stop the machine and release pressure quickly. Be thoroughly familiar with the controls.
- Stay alert — watch what you are doing.
- Do not operate the product when fatigued or under the influence of alcohol or drugs.
- Do not stand on unstable surfaces. Stand with both feet balanced at all times.
- Avoid tipping the machine on its side.
- The Gun Safety Lock PREVENTS the trigger from accidentally being engaged. This safety feature DOES NOT lock trigger in the on position.

Water Supply (Cold Water Only)

- Water hose must be at least 3/4 inch in diameter.
- Flow rate of water supply must not fall below 2.5 GPM (gallons per minute).
- Flow rate can be determined by running the water for one minute into an empty 5-gallon container.
- The water supply temperature must not exceed 104°F/40°C.
- Never use the pressure washer to draw in water contaminated with solvents, e.g. paint thinners, gasoline, oil, etc.
- Always prevent debris from being drawn into the unit by using a clean water source.

We strongly recommend that this high pressure washer not be left running for periods of 5 minutes or longer without the trigger gun being engaged.

This Kärcher high pressure washer is equipped with thermal protection to extend the life of your pressure washer. The thermal protector will automatically activate at a predetermined high temperature ejecting hot water before resetting. This ensures that the pump does not become damaged.

Caution

- Follow the maintenance instructions specified in the manual.
- This machine has been designed for use with cleaning detergents supplied or recommended by the manufacturer. The use of other cleaning detergents may affect the operation of the machine and void the warranty.
ASSEMBLY INSTRUCTIONS

Step 1   Attach the handle to the frame of the pressure washer. Align holes, insert bolts, and tighten with knobs.

Step 2   Attach the gun/hose storage handle.

Step 3   Attach the wand to the spray gun.

Step 4   Attach the triple jet nozzle.

Step 5   Attach the high pressure hose to the spray gun.

Step 6   Connect the high pressure hose to the unit’s high pressure outlet.

Step 7   Connect the garden hose to unit’s water inlet.

Step 8   Attach the detergent tray.
OPERATING INSTRUCTIONS

NOTE: Engines controls shown may appear different.

Step 1  
Check oil level. Oil level should be level with the bottom of the oil filler neck. Be sure the machine is level when checking the oil level. (Refer to the engine’s operating manual for seasonal grades.) We recommend that the oil be changed after the first 5 hours of use, then once every 50 hours.

Note: Improper oil levels will cause low oil sensor to shut off engine.

Step 2  
Fill gas tank with unleaded gasoline. Do not use leaded gasoline.

Step 3  
Connect garden hose to the cold water source and turn water on completely. **Never use hot water.**

Step 4  
Trigger the gun to eliminate trapped air, wait for a steady flow of water to emerge from the spray nozzle.

Step 5 (Briggs & Stratton)  
Turn fuel valve to “ON”. Slide the throttle control to the fast position. Move the choke lever to the “CHOKE” position (only if the engine is cool). After starting, move the choke to “RUN”.

Step 5 (Kohler)  
Turn fuel valve to “ON”. Slide the throttle control to the fast position. Move the choke lever to the “CHOKE” position (only if the engine is cool). After starting, move the choke to “RUN”.

Step 5 (Honda)  
Slide the choke lever out to the closed position (on a warm engine, leave the choke lever in the open position). Slide the throttle lever up about 1/3 of the way toward the fast position.

Step 6  
Pull the starter handle. If the engine fails to start after 3 pulls, squeeze the trigger gun to release pressure, and repeat step. After the engine warms up enough to run smoothly, move choke to open position and throttle to fast position.

Important!
Do not run the engine with a high or low oil level as this can cause engine damage.
If you have further questions regarding the engine, please refer to the engine’s operating manual included with the unit.
USING THE ACCESSORIES

The triple jet nozzle must be positioned to one of the two settings for high pressure cleaning by turning the nozzle tip. The pencil jet spray (0°) should be used for stubborn dirt. The High pressure flat spray (25°) should be used for cleaning over a large surface area. The third setting on the triple jet nozzle is used for the application of detergents.

High pressure pencil jet cleaning.

High pressure fan jet cleaning.

Low pressure Detergent application “CHEM” position.

Dirtblaster® nozzle

This nozzle features a 0° pencil jet which rotates 360° for maximum dirt cutting action, effectively increasing cleaning performance up to 50%. This nozzle combines the cleaning performance of a 0° pencil jet with the surface coverage of a wide angle nozzle. Not recommended for soft materials, siding, painted surfaces, decks or autos.

⚠️ WARNING
TO AVOID SERIOUS INJURY, NEVER POINT SPRAY NOZZLE AT YOURSELF, OTHER PERSONS OR ANIMALS.
WORKING WITH DETERGENTS

NOTE: Detergents can only be applied in the “CHEM” setting.

Step 1  Use triple jet nozzle (set to CHEM. position) to apply detergents

Step 2  Adjust the filter end of the detergent tube for light (-), or maximum (+) detergent coverage.

Step 3  Fill a container with Kärcher detergent. Place the filter end of detergent suction tube into the detergent.

Step 4  With the engine running, pull trigger to operate unit. Liquid detergent is drawn into the unit and mixed with water. Apply detergent to work area. Do not allow detergent to dry on surface.

For best results see Cleaning Tips on pages 8 & 9 for specific information on how to clean different surfaces.

Always Use Kärcher Detergents for Best Results.

Kärcher biodegradable detergents are specially formulated to protect the environment and your pressure washer. The special formula won’t clog the suction tube filter and will protect the internal parts of the pressure washer for a longer life. For Kärcher Detergents, check your retailer or call:

In USA Call: 1-800-537-4129 or visit our website: www.karcher-usa.com

The following Kärcher detergents are available:
- Vehicle Wash  House Wash
- Degreaser  Deck Wash
- All Purpose Cleaner

⚠️ Caution
Never use:
- Bleach, Chlorine products and other corrosive chemicals
- Liquids containing solvents (i.e., paint thinners, gasoline, oils)
- Tri-sodium phosphate products
- Ammonia products
- Acid-based products
These chemicals will harm the unit and will damage the surface being cleaned.
SHUTTING DOWN & CLEAN-UP

Step 1 Remove detergent suction tube from container and insert into one gallon of fresh water. Siphon water at low pressure for one minute.

Step 2 Press the throttle down to stop the engine. If the engine has a fuel valve or switch turn off.

Step 3 Turn off water supply.

Step 4 Press trigger to release water pressure.

Step 5 Disconnect the garden hose from the water inlet on the unit.

Step 6 Disconnect the high pressure hose from the high pressure outlet.

Step 7 Engage the gun safety lock.

TAKING A BREAK... five minutes or more

Step 1 Slide the throttle down to stop the engine. If the engine has a fuel valve or switch turn off.

Step 2 Press trigger to release water pressure.

Step 3 Engage gun safety lock.

WINTERIZING AND LONG-TERM STORAGE

1. Disconnect all water connections.
2. Turn on the machine for a few seconds, until the remaining water exits. Turn off immediately.
3. Drain the gas and oil from the engine.
4. Do not allow high pressure hose to become kinked.
5. Store the machine and accessories in a room which does not reach freezing temperatures.

Caution: Failure to follow the above directions will result in damage to the pump assembly and accessories.
Deck Cleaning
(with or without detergent)
Pre-rinse deck and surrounding area with fresh water. If using Kärcher Deck Wash, place detergent suction tube directly into cleaning solution and apply to surface at low pressure. For best results, limit your work area to smaller sections of approximately 25 square feet. Allow Kärcher Deck Wash to remain on surface 1-3 minutes. Do not allow detergent to dry on surface. Rinse at high pressure in a long sweeping motion keeping the spray nozzle approximately 3-6 inches from the cleaning surface. Always clean from top to bottom and from left to right. When moving on to a new section of the cleaning surface, be sure to overlap the previous section to eliminate stop marks and ensure a more even cleaning result.
Caution: Do not use Dirtblaster® nozzle on wood surface as it may cause damage.

Cement Patios, Brick and Stone
(with or without detergent)
Pre-rinse cleaning surface with fresh water. If using Kärcher All Purpose Cleaner, place detergent suction tube directly into cleaning solution and apply to surface at low pressure. For best results, limit your work area to smaller sections of approximately 25 square feet. Allow Kärcher All Purpose Cleaner to remain on surface 1-3 minutes. Do not allow detergent to dry on surface. Rinse at high pressure in a sweeping motion keeping the spray nozzle approximately 3-6 inches from the cleaning surface. Always clean from top to bottom and from left to right. For removing extremely stubborn stains, use Kärcher Dirtblaster® Nozzle.

House Siding
(with or without detergent)
Pre-rinse cleaning surface with fresh water. If using Kärcher House Wash, place detergent suction tube directly into cleaning solution and apply to surface at low pressure (for best results, limit your work area to sections of approximately 6 feet and always apply detergent from bottom to top). Allow Kärcher House Wash to remain on surface 1-3 minutes. Do not allow detergent to dry on surface, if surface appears to be drying, simply wet down surface with fresh water.
If needed, use special Wash Brush Attachment to remove stubborn dirt. Rinse at high pressure from top to bottom in an even sweeping motion keeping the spray nozzle approximately 6 inches from the cleaning surface.
Caution: Do not use Dirtblaster® nozzle on siding as it may cause damage.

Cars, Boats & Motorcycles
(with or without detergent)
Pre-rinse vehicle with fresh water. If using Kärcher Vehicle Wash, place detergent suction tube directly into cleaning solution and apply to surface at low pressure. For best results, clean one side of vehicle at a time and always apply detergent from bottom to top, do not allow detergent to dry on surface. Rinse at high pressure in a sweeping motion keeping the spray nozzle approximately 6-8 inches from the cleaning surface (distance should increase when rinsing pin-striping or other sensitive surfaces). Always clean from top to bottom and from left to right. For best results, wipe surface dry with a chamois or soft dry cloth.
Caution: Do not use Dirtblaster® nozzle on vehicles as it may cause damage.
Barbecue Grills, Outdoor Power Equipment & Gardening Tools
(with or without detergent)
Pre-rinse cleaning surface with fresh water. If using Kärcher All Purpose Cleaner or Degreaser, place detergent suction tube directly into cleaning solution and apply detergent at low pressure. Allow Kärcher detergent to remain on surface 1-3 minutes. Do not allow detergent to dry on surface. Rinse at high pressure keeping the spray nozzle approximately 3-6 inches from the cleaning surface. For removing extremely stubborn dirt, it may be necessary to move the spray nozzle even closer to the surface for greater dirt cutting action. To remove caked-on mud from garbage cans, lawn mower blades, wheelbarrows or other non-sensitive metal surfaces, you may want to use the Kärcher Dirtblaster® Nozzle. Caution: Do not use Dirtblaster® spray nozzle on cloth, plastic or other sensitive surfaces as it may cause damage.

Patio & Lawn Furniture
(with or without detergent)
Pre-rinse furniture and surrounding area with fresh water. If using Kärcher All Purpose Cleaner, place detergent suction tube directly into cleaning solution and apply to surface at low pressure. Allow Kärcher All Purpose Cleaner to remain on surface 1-3 minutes. Do not allow detergent to dry on surface. Rinse at high pressure in a sweeping motion keeping the spray nozzle approximately 3-6 inches from the cleaning surface. For best results, clean from top to bottom and from left to right. Caution: Do not use Dirtblaster® nozzle on patio or lawn furniture as it may cause damage.

Recommendations:
• Before cleaning any surface an inconspicuous area should be cleaned to test spray pattern and distance for maximum cleaning results.
• If painted surfaces are peeling or chipping, use extreme caution as pressure washer may remove the loose paint from the surface.

OPTIONAL CLEANING ACCESSORIES
Optional cleaning accessories are available to further enhance your cleaning capabilities. See accessories order form for product descriptions and ordering instructions.
• Dirtblaster® nozzle
• Extension Wand 80”
• Rotating Wash Brush
• Sand Blasting Attachment
• Hose Reel
• Pipe Drain Cleaner
• Extension Hose 30’
• Detergent Tray
